

Video Value Extracted

BriefCam Syndex FS+

Extract value and actionable information from your video.

BriefCam Syndex FS+ is intended for law enforcement and/or security officer teams: multiple users responsible for the post-event and/or routine review of an unlimited number of video files for investigative purposes, as an individual, group or collaborative effort.

Video Synopsis is the simultaneous presentation of objects, events and activities that occurred at different times.

Users can pinpoint events of interest, reach targets quickly and take the required action using BriefCam Syndex FS+, an advanced product based on BriefCam's award-winning Video Synopsis® technology for rapid, accurate video review.

In addition to offering a powerful set of tools for fast video review, BriefCam Syndex FS+ augments the basic Video Synopsis by allowing users to search video according to parameters that they define: size, color, speed, area and direction. All parameters are under the user's control. Additional attributes can be imported from external sources.

Like all good search engines, BriefCam Syndex FS+ ranks the Video Synopsis results in order by probability – from highest to lowest – ensuring that the most relevant events of interest are presented first.

BriefCam Syndex FS+ integrates human experience, intelligence and intuition as a vital part of the search and review process. The mind and eye are always engaged.

With BriefCam Syndex FS+, users gain access to immediate, actionable information from their video for decision support, security and safety applications.

Refine by color

Refine by direction

Refine by size

BriefCam Syndex FS+

Benefits

- Discover previously unreported/undiscovered events
- Get better evidence, faster
- For large teams of investigators working on multiple cases
- Offline video investigations can be synchronized to the central database
- Used successfully by law enforcement and investigative agencies worldwide
- Reduce manpower time and costs
- Integrates the user's experience, intelligence and intuition
- Export and share investigation information
- Object attribute control further reduces review time
- Standalone. No integration needed

Key Features

- Accepts video from a wide range of sources and formats
- Case management/access control for team investigations
- Accommodates centrally connected and/or offline clients
- Highly scalable: DB capacity, users and servers
- Control object attributes (e.g., size, direction, color, speed)
- Hours of video can be reviewed in minutes
- 1-click event selection indexes back to the original video
- 1-click export of Video Synopsis and/or original video
- Bookmark and annotate objects for team collaboration
- Area of Interest/Area of Exclusion
- Easy to operate

BriefCam Syndex FS+	Video Files	N/A	5+	Online & offline	✓	Multiple servers
BriefCam Syndex EP	VMS cameras/files	50 - 200	2	Online	X	Single server
BriefCam Syndex EP+	VMS cameras/files	100 - unlimited	2+	Online & offline	✓	Multiple servers

System Requirements

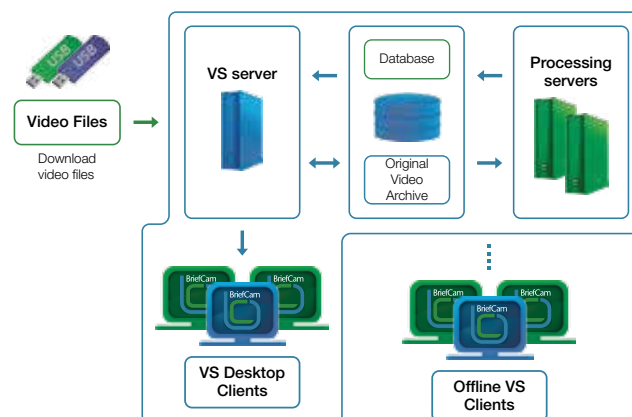

Server Requirements

- CPU: 6 Core (e.g. i7-3930k 3.2GHz or Intel Xeon E5-1650 3.2GHz or equivalent)
- Memory: 16GB RAM
- Available disk space:
Primary disk (SSD): 100GB (for the OS)
Secondary disk: 2TB (for the application & DB)
- Operating System: English Windows server 2008 R2, 64-bit, SP1 (.NET4.0)
- Network Card: 1Gb LAN

Client Requirements

- CPU: Quad Core (e.g. Intel i7-3770 3.50 GHz)
- Memory: 8GB RAM
- Operating System: Windows 7, 64-bit (.NET4.0)
- Network Card: 1Gb LAN
- Dedicated graphics card
